Just a few of the possible options:

- NFSP scrolls content sections and categories. You can scroll any section or category with this module.

- NFSP is copy module compatible; allowing you the ability to copy this module and run different sections or categories on a single page.

- NFSP has a multitude of options for your convenience.

- NFSP can display items on newest, oldest, by ordered, created, most popular, least popular or random and can be sorted by Ascending or Descending order.

- Display a details link with each item that points to the full article, with a variety of text options for the details link title.

- Can be used as a non-scrolling content display module.
